Please advise the graphics coordinator if you require color matching to either a Pantone color code or a physical sample. Digital artwork will be output in CMYK color coding. However, any required color matching must be supplied in the form of a Pantone solid coated number in order to achieve the most accurate print equivalent. While we make every effort to cross check and swatch-match your Pantone codes, slight variation in color can occur. Please bear in mind that colors displayed digitally on your mobile device or desktop monitor may be calibrated differently in contrast to the finished product. Every effort is made to match colors between alternate material types and previous orders. Please note that there

can be color variation between PVC material, marquee fabric polyester and banner fabric polyester, as well as

variation between sublimation printing and UV method printing.

This graphic template is designed at a 10% scale of the final product. Please reference the 'Bleed' layer to build your artwork and only place your artwork elements within the 'Design Layer' of this document. Rasterized (pixel-based or Photoshop) artwork should be supplied at a minimum 300dpi to suit this template size. The Extreme Canopy logo and tag will be printed or sewn on to the valance panels as shown above unless instructed otherwise to your graphics coordinator. COPYRIGHT EXTREME CANOPY 2022

Any free to download font can be used c alternatively please supply your font.

Please state to our Graphics Coordinator if you require this changed.
